DCC DECODER ADDRESS/CONSIST/THROTTLE REQUISITION FORM

As of October 5, 2003 all requests for a locomotive DCC decoder address must be approved by the DCC committee. Please first consult the published list of assigned locomotive addresses. This list will always be displayed at the club and will be updated frequently. Then, fill out the form below and leave at the club. Once the request is approved, the address can be assigned. You can, however request that the decoder be installed before the address requisition is approved. This means that you can request a "hold" on a decoder address before the decoder is installed. Such requests will be held for 30 days or until the decoder is installed. The locomotive need not be painted or lettered before an address is assigned. Once installation has been verified, the requested address will be approved. **Please Print.**

Today's Date: _____ Name: _____
last *first*

Phone # _____ e-mail address: _____

Throttle Requisition Number: _____ (Valid numbers are 2-64, check current list at club)
